CORRUPTION - FREE INDIA FOR A DEVELOPED NATION

Corruption, what do you know about corruption? According to me the corruption is human ~~made~~ mind made concept which is harmful for our nation. Corruption is a concept in which any private and government work will not proceed if you will not pay extra money or do some other work for proceeding the file. In it the people having excess of money complete its task in few days but people of middle class who have not more amount of excess money will take a long period of time to complete its task. This is because of a ~~corruption~~ corruption. For example: A people having case in a lower court and the judge is corrupt because of that the opponent party give some money to judge and judge give the decision in the side of opponent party. He know that the opponent party is wrong but because he take money from the opponent party he have to give the decision in the side of opponent party. This all is because of the word corruption. We are saying this word 'corruption' so time, but what does its really mean. The real meaning of corruption is that your are being corrupted by anyone by anymode means you have to go to the side of that person ~~who~~ who corrupted you. Now How to prevent corruption:

The ways by which we can prevent

- 1) Do not give the money to any officer for your work.
- 2) If he/she is asking for money or any other thing like (House, flat, land etc) as a mode of money complaint to the officer which is on higher post with proof, etc

These are the some ways by which we can stop corruption. But this @ time means in this era all the officers and people are corrupted and due to this our economy rate are also decreasing. You think that what is the relation b/w economy and corruption. Yes there is a relation between economy and corruption too. ~~In fact~~ Because of the corruption a poor people also have to pay money to the officer for completing his work because of that the people have to sell its all property and he comes below the poverty line. Due to this our economy rate also decreases. The no. of people of ~~below~~ below poverty line start increasing.

You only think that the corruption are done only by money. ~~no~~ If you are thinking that you are wrong. Because the mode of corruption is not only money there are many other ways like In the school (not applicable for all schools) a teacher have a son and she wants to that my child will also study in this school. Because the teacher is a regular in school and a staff also because of that his child does not need to give any entrance exam but he is not capable for that class. But there is a student who is giving the entrance exam and didn't get the seat because seat is full. This is also a way of corruption In the government school the students don't

mid-day meal. The money is taken by the middle officers. This is also a corruption.

At last I want to say that if anyone taking money (as a way of corruption) asking for money please complaint on that officer with proof and also do not give ~~cash~~ money as a corruption to anyone. Follow the rules which are given by government for the process of any official file or work.

THANK YOU :-
