

# Message to Students & Parents

Dear Students and Parents,

**Jai Narayan.**

By the grace of almighty we have completed session 2021-22 after so many ups and down situations caused due to Covid. We have witnessed three waves and lucky to survive.

My heartiest wishes and congratulations to all students for their promotion in next class. I congratulate teachers for being supportive in bringing out the hidden wisdom and strength of the children.

Now from **4<sup>th</sup> April** new session 2022-23 is going to start and once again I pray almighty to be with us and bless us the power to move with full consciousness, clarity and humanity.

This session we are going to implement **NEP 05+03+03+04** formulae in our school curriculum. Students will be in the front handling and holding various tasks, responsibilities and duties to enhance learning and to grow together.

My humble request to the parents to support learning by doing and don't stress students to run for marks. Parents support needed for their development of twenty first century skills. As an academic head I wish that parents do take care of Personal hygiene, physical & mental health and Vocabulary of child is in practice at home. The first school of child is home so, etiquettes, sympathy, empathy and being sensitive behavior to be inculcated at home only. If parents could support the child to believe in self and make them confident the growth and development of child could not be stopped or hindered. Therefore parents are requested to support us.

Now as student part the first major need of an hour is that student should focus on three major areas:

- (a) Communication Skill
- (b) Numeracy Skill
- (c) Writing Skill

Apart from scholastic areas student should focus on self discipline, character building, develop the power of concentration, accept and find the solutions to the challenges of life in different areas, Believe in self. Be bold and fearless, expand your Heart and always be open to learn from anyone.

Once again I wish lots of success and best wishes for the upcoming session 2022-23 and have strong belief that students of **SMPPS** will definitely grow and shine like star and became the model for others.

**Thank You**
